

Call for Special Sessions

On behalf of the PMAPS 2022 International Society and the Local Organizing Committee we would like to invite experts in the application of probabilistic methods to power systems to submit proposals for Special Sessions. In particular, we would like to encourage submissions from:

- R&D projects funded by international schemes.
- R&D projects funded by national schemes.
- Industrial or academic initiatives addressing a timely topic.

Special Sessions will take place from Monday 13th to Wednesday 15th June 2022 throughout the day. These sessions have an allocated time of approximately 1.5 hours and therefore can have up to 5 presentations (each 15 minutes plus Q&A). The content of the Special Sessions can be either broad to serve as an introduction to a topic addressed by the project or deep in order to focus on the corresponding findings.

If you would like to submit a proposal, please send the information listed below (with attachments if applicable) to the Technical Chair, Dr Robin Preece (robin.preece@manchester.ac.uk) by **Friday 21st January 2022**.

- Special Session Title.
- Special Session Chair (name, affiliation, contact e-mail, and a short CV or link).
- Abstract. No more than 300 words. Including details of the R&D project involved if applicable.
- List of Presentations and Speakers (name, affiliation, contact e-mail, and a short CV or link).

Special Sessions will be allocated infrastructure (room, AV equipment, etc.) and will be advertised alongside the different activities of PMAPS 2022. All speakers must register for the conference. The chair of the session will be given one (1) free registration for the conference provided the special session brings at least three new registering participants (i.e. speakers who are not also presenting additional papers at the conference). PMAPS 2022 will not cover travel and accommodation related expenses.

Important Dates:

- Deadline: **Friday 21st January 2022**
- Notification of acceptance: Friday 25th February 2022
